

Our Employees

Are collaborative and team oriented. They are trustworthy and committed to the long-term success of both Compu-Tech and its customers. They value hard work, but also maintain a light-hearted, collegial atmosphere.

Position Summary

This role is a Programmer/Software Engineer position working on Compu-Tech's AG Base™ software and assisting in the team development of our OnPoint™ application suite. We are looking for an experienced desktop application or web application developer, who is also willing to meet the requirements of learning basic skills to support our IBM RPG IV programming team.

Compu-Tech is willing to provide training to candidates that have applicable programming or technical experience.

Responsibilities

- Collaborate with a team to design, build, implement and maintain functional features of assigned desktop and/or web applications.
- Build applications that interface to Compu-Tech's in-house API (REST web services exchanging XML).
- Proposed responsibilities related to Compu-Tech RPG software development include:
 - Refactoring reports to include Excel/Email capabilities.
 - Setting up interfaces for banking processes such as ACH, direct deposit, check reconciliation and positive pay.
 - Create overlay documents such as Bills of Lading, Invoices, W-2s, 1099s, 1095s, Checks, Check File Copies, Electronic Signatures, etc. and install/test with the customer.
 - Assist in developing maintenance programs, validation logic, and defining new database files.
- Communicate with both technical and non-technical colleagues and customers to assist with questions related to Compu-Tech systems.
- Document software processes and business logic via functional specifications and other design documents.
- Evaluate performance of projects after they are released; tune, re-evaluate the design and implementation of business logic and continually improve functionality based on customer requests and feedback.

Qualifications

- At least three years professional experience in architecture, design, and development of web and/or desktop applications.
- Proficiency in a language such as Java, C++, C#, .NET, JavaScript, Python, Ruby, etc.
- Proficiency developing rich UIs utilizing frameworks such as EXT JS, React, Angular JS, or desktop applications using Java Swing is desirable. Experience with MySQL, Spring, JPA/Hibernate, and REST services using Jersey or RESTEasy is also a plus.
- Solid experience in Java or JavaScript development is highly desired.
- Strong command of SQL is highly desired.
- Proficiency developing applications that interface to a relational database is highly desired.

- Knowledge and expertise in software engineering methodologies and effective application testing.
- Bachelor's degree in computer/engineering related field or equivalent work experience a plus.
- Proven ability to deliver high quality results in a timely manner.
- Excellent oral and written communication skills.
- Ability to work collaboratively in a team environment.
- Must work on-site in our Wenatchee office 40 hours per week.

Physical Demands and Work Environment

Duties are performed in an office environment while sitting at a desk or computer table. This position requires the ability to use a computer keyboard, communicate over the telephone, and read printed material. Duties may require being on call periodically and working outside normal working hours (evenings and weekends). Duties may also require occasional travel for training, meetings, customer assistance or convention attendance.

Location:

Compu-Tech, Inc. is located in Wenatchee, WA. This position requires full-time attendance in our Wenatchee office. Candidate will be required to relocate to the Wenatchee area for this position.

Benefits:

We offer a competitive salary based on experience. This position includes medical and dental benefits as well as a 401k option.
